***REASONS FOR ALLOWANCE***

1. The following is an examiner's statement of reasons for allowance: The prior art taken either singularly or in combination fails to anticipate or fairly suggest the limitations of the independent claim(s), in such a manner that a rejection under 35 U.S.C. 102 or 103 would be proper. The prior art fails to teach a combination of all the claimed features as presented in claim(s) 1-4, wherein a holder-mounted optical element comprises a cylindrical holder and an optical part where the holder has a thin deformation portion that is deformed by pressure applied inner side and a surplus portion from the optical element press-contacts the deformation portion, as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Preliminary Amendment***

2. Acknowledgment is made of entry of Preliminary Amendment filed 3/9/04.

***Conclusion***

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The following references are cited for disclosing a press molded lens, but these reference do not disclose a holder-mounted optical element comprises a cylindrical holder and an optical

part where the holder has a thin deformation portion that is deformed by pressure applied inner side and a surplus portion from the optical element press-contacts the deformation portion, as claimed: Myers (810375), Copeland (3244497), Sato (4591373), Marechal et al. (4734118), Kimoto et al. (5015280), Hirota et al. (4836840), Murata et al. (5032160), Nomura (5188650), Takagi et al. (5630859) and Morimoto et al. (5805361).
